Approval Plan

Need books from other countries, but don't know the language?

East View's art approval plan is the easiest way to add new titles from countries of Eastern Europe, Eurasia, and East Asia, achieving your collection development goals while saving you time and money.

Libraries complete a profile containing general parameters (geographic coverage, languages, formats of publications, special instructions, etc.) and subject parameters. Publications that fall within the profile are shipped at intervals determined by the library according to the designated budget.

Approval plan customers have a range of art subject areas to choose from: from art theory to art albums, from museum publications to art exhibition catalogs, etc.

RDA bibliographic records are supplied free of charge to approval plan customers. Each client will be assigned a specific approval plan account manager to ensure fast customer service and delivery of the most relevant materials to your library.

Firm Orders

We welcome firm orders for items from any region we cover, whether or not you see the book currently in our catalog, and may also be able to help with books published outside our standard 36 covered countries (ask us about Israel, Singapore, Egypt, etc). We do search for out of print materials upon request, free of charge.

New Book Alerts

Once per month, we email interested customers a list of new art books added to our catalog. This is a free, no-obligation service that you can opt out of at any time.

If you wish to sign up, you can do so on our website, or email your request to evmail@eastview.com.

We can also provide Excel suggestion lists by the region, language, and/or subject area(s) that suit your library's current needs upon request.
