- Transportation, post & telecommunications

The CNKI China Statistical Yearbooks Database (CSYD) is a unique digital repository of statistical and census data published officially by the mainland Chinese government.

Authoritative Statistics from China

Yearbooks on a wide range of economic, social and environmental topics are accessible at your desktop.

Coverage

- CSYD offers 450 titles containing over 2,600 volumes of statistical yearbooks, including about 150 continuously published statistical yearbooks in China
- Searchable at the local level
- Access current and retrospective content

Easy-to-use interface

CYSD offers convenient and prompt ways to analyze data. Point and click on a title to browse or even locate tables or graphs.

Researchers may limit searches to only statistical yearbooks, analysis reports, compilations, investigation data, general survey data, or statistical summaries.

Other options for searching include:

- **Data Search:** To search for data and tables, choose from three search modes: Index Value Search, Standard Search and Index Definition
- **Data Analysis:** Compare districts, indexes, and years to analyze single or multiple indexes.
- **Yearbook Navigation:** Browse or search only the statistical yearbooks you need.
- Articles may be viewed in PDF, and statistical charts and tables may be downloaded and saved in EXCEL.

Over, please

CYSD: China Statistical Yearbooks Database

Informative

Ideal for academic and special libraries.
Meets advanced research needs of:

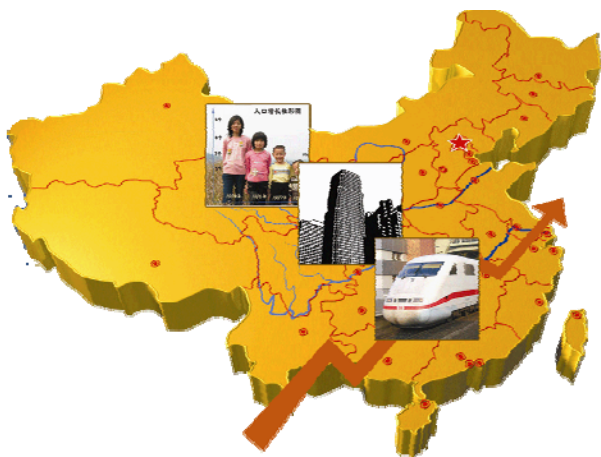

- ◆ Faculty and graduate level studies
- ◆ Commercial advisors in banking and finance
- ◆ Statisticians and economists
- ◆ Information professionals

Languages

Primarily Chinese, with many headings and tables of contents translated into English.
