

## *East View Universal Database*

# Publications from the Baltics, Belarus, Moldova, and Ukraine

Featuring publications from Russia's western neighbors: Belarus, Estonia, Latvia, Lithuania, Moldova, and Ukraine, *East View's Universal Database of Publications from the Baltics, Belarus, Moldova, and Ukraine* now makes it easier than ever to stay informed of events in eastern and central Europe.

The countries represented in this database are on a perpetual balancing act between Russia and European neighbors. Estonia, Latvia, and Lithuania, often referred to as the "Baltic countries", have been members of the European Union and NATO since 2004, and the others are in varying stages of interdependence or estrangement from Russia.

This full-text, with some full-image, electronic database contains about 10 active titles of official and independent newspapers and journals, with some going back as far as 1997. Topics covered include current events, politics, economics, science, culture, and public life.

The sources are in mostly in Russian, with a few notable exceptions. The list of titles and language of publication are on the reverse of this flyer.

### Search Features

Mirror servers in Minneapolis and in Moscow minimize transient conditions on the Internet, while offering sophisticated querying and global searching, including:

- User friendly search includes Cyrillic transliteration in a virtual keyboard, browse capability
- Flexible search options— better than print, allowing users to search the entire database or only within individual titles

### Request a trial
