Statistical Publications of Ukraine

Reliable Statistics from Ukraine, in Digital Format

Even before the recent crisis with Russia and the annexation of Crimea, Ukraine’s population was shrinking. Access to up-to-date reliable and authoritative statistics is imperative for today’s researchers who analyze key economic, social, and environmental trends in Ukraine.

East View offers an indispensable source of information on the economic and demographic situation of Ukraine: **The Universal Database of Statistical Publications of Ukraine** featuring comprehensive statistical data from the State Statistical Services of Ukraine.

Found in this database are monthly reports, annual statistical abstracts, special bulletins, and more, covering Ukraine’s:

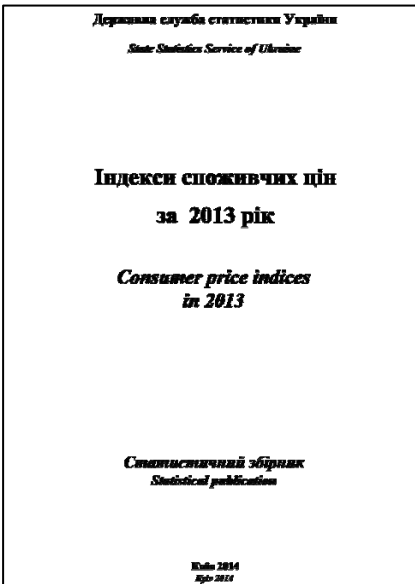

- Domestic and foreign trade
- Macro-economic sectors
- Labor and employment
- Foreign investment
- Communications and transportation infrastructure development
- Demographic trend
- Household economic performance
- And more...

Each publication is in smart PDF, which allows researchers to search and view all contents, graphs, and charts, as well as copy and paste text into other programs.

Now researchers, academics, analysts, government planners, policy decision makers, and business enterprises have the tools to gain data-driven cross-sectional analytical insight into Ukraine’s overall social, political, and economic environment.
