### POWERFUL, INTELLIGENT, RELIABLE

Other companies offer data on Asia, but no one has more accurate, constantly updated information

The AsiaOne Corporate Data Base already covers 10,000 of the most influential companies in China, Japan, Taiwan, Hong Kong and Korea. In addition, we have recently added extended coverage of approx.

1 million unlisted companies in Japan. We will continue to expand and deepen our coverage of the entire region year by year.

### The world's most authoritative multi-lingual repository of information on Asian companies is steadily growing!

Comprehensive as this data is, it is only the beginning. AsiaOne is constantly growing.

We are working now to bring you the same high-quality detailed information on all the important companies in:

Some of this data will become available later in 2010, and some will come online starting next year. As the service expands, it will provide the only complete, up-to-date coverage of the world's most dynamic region. In addition to continuing to expand the regional coverage, all the individual country data will be constantly revised and updated, bringing you the most authoritative, most complete and most accurate profiles of Asian companies available anywhere today.

The AsiaOne Corporate Data Base is already widely used by thousands of universities, research institutes, banks, securities firms, trading companies, insurance companies, asset managers, and other businesses looking to monitor the activities of their competition.
