The Index to Hebrew Periodicals (IHP) – Abstracts of major Hebrew journals from 1977 to date with the exception of weeklies and newsletters. IHP covers a variety of subjects with an emphasis on Judaica, literature, education, arts, law, and current Israeli affairs (politics and society).

The Bar-Ilan Indexing Project – Carried out by the Indexing Unit of the Wurzweiler Central Library, it consists of two parallel projects: 1) an index to articles in the literary supplements of the daily Hebrew press (1985–). Includes the supplements of Ha'aretz, Yediot Aharonot, Ma'ariv, Ha'tsofeh, Yated Ne'eman, Ha'modia, Al-Hamishmar, Davar and Hadashot (the latter three – until they ceased publication); and 2) indexes to other Hebrew periodicals: Orlogin (1950–1957), Meliia (1944–1956), Bar-Ilan (1965–1989) and Molad (1948–1986).

The Eretz Israel Database (EID) – A project of the University of Haifa Library in cooperation with the library of Yad Yitshak Ben Zvi, EID complements the IHP with additional material relating to the history, geography, and archaeology of the land of Israel.

The Tel-Hai Index to Hebrew Newspapers (THIHN) – A project of Tel-Hai College Library in Upper Galilee where indexing was produced and then input by the University of Haifa. Particular emphasis given to longer, analytical articles on social, economic, and political topics (including "op-ed" articles) as well as significant reviews of books, exhibitions, theater, and other cultural events.

The Index to Hebrew Periodicals Thesaurus – All four component files share the same common thesaurus of indexing terms. The Index to Hebrew Periodicals thesaurus is the largest and most comprehensive thesaurus of Hebrew indexing terms. It contains about 230,000 subject entries. Subjects are interrelated using the standard broad/narrow/related term relationships, as well as scope notes and synonyms.
