

Chernobyl Newspapers Collection

Important primary source material from Chernobyl

The **Chernobyl Newspapers Collection** includes three previously unavailable local newspapers — *Prapor peremohy*, *Tribuna Energetika*, and *Trybuna pratsi* — published in towns in the exclusion zone and its immediate vicinity. The newspapers *Prapor peremohy* and *Trybuna pratsi* provide researchers with an opportunity to explore the larger socio-cultural and historical context of the regions affected by the Chernobyl disaster. *Tribuna Energetika*, published under the aegis of the Chernobyl Nuclear Power Plant, provides insight into the everyday life of the power plant and the city of Pripyat. It includes coverage of the operation of the power plant, its construction and expansion operations, as well as the life of the community of workers and specialists stationed there. Together these three publications offer researchers unique access to important lesser-known primary sources from the era, providing essential information for study of the social background and history of the Chernobyl disaster.
