

Russian Medicine and Public Health Journals (UDB-MED)

A collection of Russia's leading medical and health periodicals

The core of the Russian Medicine and Public Health Journals (UDB-MED) collection is represented by journals of Meditsina, the most authoritative medical publisher in the country. There are also several other respectable medical publishers, such as Dinastiia, Remedium, Russkii vrach and Velt. Research in this collection covers such issues as public health, infectious diseases, general practice, pharmacology, pediatrics, nursing, skin diseases, and more.

East View's Universal Database™ Platform

As the largest provider of authoritative information on Russia and the former Soviet Union, East View offers an innovative approach to electronic research. We maintain redundant hosted environments for this content in Minneapolis and Moscow on our Universal Database™ platform (UDB).

Customize and Optimize Your Library

- Build collections from individual online titles
- Link options for Online Public Access
- IP/password access to standard or custom collections
- Stable URLs for linking on a database level or on individual title and article levels
- Mirror servers in U.S. and Russia
- Usage reports in COUNTER format

Increase Your Efficiency

- Interface functions are optimized for specific content types
- Browse by specific title and issue
- Mobile friendly access
- Easily exportable citations
- Transliteration, Russian, Ukrainian or English language searches
- Virtual Russian and Ukrainian keyboard displays available for ease of input
